

SOEN 6841 (Winter 2024)

Learning Journal

Student Name: Jaymin Shantilal Suhagiya

Student Id: 40232368

Journal URL: [Journal week:1](#)

Week 1: Jan, 18 2024 – Jan, 24 2024

Date: 24th January 2024

Key Concepts Learned:

- Main Concept that I have learned this week is Introduction to software project management.
- I found SMART a really interesting way to describe the Objective of the software project.
- Other topics that I have learned during this week:
 - Project Initiation
 - Project Charter
 - Project Scope

Application in Real Projects:

- While working as a developer, I now have an idea of how projects are processed at the management level before they come to me for development purposes.

Peer Interactions:

- I made new friends in the first class.
- I virtually interacted with members of my project group.

Challenges Faced:

- As such, I haven't faced any challenges, and everything is going smoothly until now.

Personal development activities:

- I have read the chapters from the book, and I believe they are interesting and relevant to my career as a developer. As mentioned in the learning section, these chapters help me gain an overall idea about project life cycles.

Goals for the Next Week:

- Starting next week, I will read the chapters and attend the class.
- Later in the week, I will contact my project teammates and work on our first project submission.
